

QPro Pig Finisher

V21652 (Act 36 of 1947)

Product description

QPro Pig Finisher is given after the growth phase has passed and when a heavier and fatter carcass is desired. This product is formulated with a higher energy value and a lower protein value to ensure a faster deposition of fat and to decrease feed cost. The product also contains a balanced amount of vitamins, minerals and trace elements to produce the ideal baconer.

Feed recommendation

It is important to gradually accustom or adjust pigs with any change from one feed to another. This prevents feed stress or refusal of feed and thus prevents growth loss. Growing pigs are very sensitive to dietary changes, therefore the client has to be patient and strict in this regard.

Feed pigs at 3-3,5% of body mass. Ensure that clean water is always available. Feed up to marketing weight (90-100 kg).
